

## **Tellabs Connections Enterprise Newsletter**

**A quick monthly summary of our best news, blogs, case studies, and white papers**

Welcome to the latest edition of the Tellabs Connections monthly newsletter. This newsletter highlights our top blogs, case studies and news items, keeping you informed about how Tellabs Optical LAN is continuing to drive innovation for the modern enterprise LAN.

What's new and exciting this month:

- Watch the CI&M videos highlighting OLAN 10G and multimode optical splitter support
  - It's Cybersecurity Awareness Month, so learn how OLAN drastically improves security
  - Our updated Passive Optical LAN white paper is now available for all
-

## **CI&M moderates two videos covering Tellabs FlexSym 10G OLAN and Multimode Optical Splitters for enterprise LANs**

Watch these two videos hosted by Cable Installation & Maintenance Magazine to hear how Tellabs FlexSym Series delivers the first symmetrical 10G XGS-PON solution specifically designed for enterprise LANs and how singlemode to multimode optical splitters produce better economics for Tellabs Optical LAN projects... [Read more](#)

## **Tellabs and the US DHS are advocating for national cybersecurity awareness throughout the month of October**

With October being the US Department of Homeland Security cybersecurity awareness month, you should know that Tellabs Optical LAN is undeniably a more secure network architecture that better safeguards the nation's critical infrastructure by reducing network vulnerability points... [Read more](#)

## **If you are looking for a vendor neutral Passive Optical LAN white paper, feel free to use our updated comprehensive white paper**

This Passive Optical LAN white paper has sections covering how POL helps modernize network infrastructure while saving both CapEx and OpEx, and realizing all of the benefits of converged network services. The POL white paper discusses how a fiber-based LAN furnishes high bandwidth while increasing the security and reliability of enterprise networks... [Read more](#)
