

SPEND LESS TIME ON SYSTEM INSTALLS WITH CLOUD-HOSTED

With rapid implementation, you can get up and running with cloud-hosted access control immediately.

How you save time

- **Rapid implementation** - Get up and running with cloud-hosted access control immediately. On-premise implementations require days and weeks for installation but our cloud-hosted systems are built to specs and Millennium tech support can get your site live within minutes.
- **Seamless upgrade** - Moving from on-premise system of the Millennium access control to cloud-hosted is seamless and affordable. You save time and effort while our tech support gets you converted or rolled-over.
- **Maintenance free** - Patching, upgrading and testing applications due to server upgrade requirements can take up days of IT staff time every month, but with cloud-hosted access control none of this is necessary. That's because it's all handled in the cloud, leaving your staff with more time to work on new projects.
